

The heatmap displays the relationships between 18 agents, labeled 'agent 0' through 'agent 17' on both the x and y axes. The color scale ranges from dark blue (low interaction) to light blue (high interaction). The diagonal elements, representing self-relationships, are the darkest blue. The upper triangle shows a pattern of varying interaction levels, with some agents (e.g., agent 0, agent 1, agent 2) showing higher interaction with others. The lower triangle is predominantly dark blue, indicating a baseline or no interaction for those pairs.
